

~~SECRET~~/NOFORN - HANDLE VIA SKEET CHANNELS ONLY

PROJECT SUN STREAK (U)

**WARNING NOTICE: INTELLIGENCE SOURCES AND METHODS INVOLVED**

PROJECT NUMBER: 8717

SESSION NUMBER: 1

DATE OF SESSION: 09 DEC 87

DATE OF REPORT: 14 DEC 87

START:

END:

METHODOLOGY: ~~CRV~~ SoLo

VIEWER IDENTIFIER: 003

1. (S/NF/SK) MISSION: See attached tasking data.
2. (S/NF/SK) VIEWER TASKING: 003 was briefed just prior to session and was provided with the individual EEI data (attached).
3. (S/NF/SK) COMMENTS: None. A11

~~SECRET~~ / NOFORN - SKEET CHANNELS ONLY

CLASSIFIED BY: DIA-DT

DECLASSIFIED BY DAPR 10/20/2008

SOLO FLIGHT / FREE FLIGHT

COORDINATES: 589281/856562

INSTRUCTION: Access the Target Site at 589281/856562 and identify/describe the structure(s) of high intelligence interest. Address and respond to the following EEI:

- a. Provide an overview of the Target Site and identify the structure(s) of specific intelligence interest.
- b. Describe the purpose and actual or intended use of the new/recent construction activities at the Target Site.
- c. Provide conceptual drawings in support of your findings.

9 DEC 87

Approved For Release 2000/08/08 : CIA-RDP96-00789R000200200001-7

Sense of two or three large, dark colored structures with more than usual number of external angles set in an open area that is cold, dim, windy, perhaps snowy. Sense of USSR, somewhere central. Structures are located on what was originally open land with a few small structures of temporary nature (which were displaced by construction) in a corner of a larger governmental/military reserve--an area from which access by undocumented individuals is proscribed. Interior of structures is warm, comfortable, contrasting with weather conditions outside. Impression of various people inside who appear to be concentrating on or engrossed in their activities. one is wearing glasses and is peering at something in a mediumly lighted room. He is working with and near sophisticated equipment pieces. The setting makes me think of someone sitting at an electronic position at a field station. However, sense is that this is not that sort of place. Impression of "biophysics" (may be AOL), "research", "operationalizing", instructing, demonstrating, "rendering practical", all come out seemingly connected with some sort of technology or a connecting of technologies. The idea seems to be of centralizing--of gathering a heterogenous but connected group of activities conducted piece-meal at other locations together into one consolidated location to facilitate interchange and connection so as to not only cut down on resource use but to expedite interchange of materials, information, and personnel between difference departments/divisions. Activities are not of private sponsorship but seem defense related. They use high levels of power, and the structure's shapes reflect the requirements of the activities conducted within. However, there is also a lot of admin/mundane type paperwork involved here, like this "center" is responsible for all the admin action, reporting, documentation, "franchising", sponsoring, resource management, etc. of the activities involved. There is an idea--perhaps AOL--of "around", and equipment as thus:

*David Kubler*  
(refer to original transcript for sketch)

--suggesting former accelerator-type sites visited in the past. An impression of some connection with satellites, if for nothing more than communication relay, is suggested. Strong AOL of NSA was received as typing of summary proceeded.

Several of 2 perhaps 3 large, dark colored structures with more than usual number of external angles set in an open area that is cold, dim, windy, perhaps snowy. Setting USSR, somewhere Central. Structures are located on what was originally ~~an~~ open land with a few small structures of temporary nature in a corner of a larger governmental/military reserve - an area from which access by undocumented individual is proscribed. Interior of structures is warm, comfortable, contrasts with weather conditions outside. Impression of various people inside who appear to be concentratedly or engrossed in their ~~joint~~ activity. One is wearing glasses & is ~~receiving~~ pouring out something in a medium 1.7 room. He is working with and near sophisticated equipment pieces. The settings make me think of someone sitting at an electron pointer at a field station. However, sense is that this is not that sort of place. Impression of "biophysics," "research," "operations," "instructions," demonstrating, rendering practical all come out seemingly connected with some sort of technology or a connection to technology. The idea seems to be of centralizing - of gathering a heterogeneous but connected group of activities conducted piecemeal at other locations together into one consolidate location to facilitate interchange & conversion so as to not only cut down on resource use but make exchange of information & material between various departments more quickly and responsively. Activities are not of private sponsorship but from some official related.

Approved For Release 2000/08/08 : CIA-RDP96-00789R000200200001-7

They are high level of power, & the structures <sup>3</sup> steps reflect the requirements of the activities conducted within. However, there is also a lot of admin/musane type paperwork involved here, like ~~the~~ this "center" is responsible for all the admin action, reporting, documentation, financing, sponsoring, resource management, etc. of the activities involved. There is an idea - perhaps DOL of "around," + equipment as thus:

Sugesting former accelerator-type sites <sup>visited in</sup> the past.
